

Dear Admissions Committee,

I appreciate the opportunity to provide additional information about my educational circumstances. While the questions above capture specific aspects of my academic history, I believe it's essential to offer a more comprehensive view of my educational journey.

Educational Pathway:

After completing my primary school education, I gained admission to Islahudeen College, Iwo, Osun State, Nigeria, to pursue a science program. Throughout my secondary school tenure, I consistently ranked among the top 5 students from year 1 to year 6. In the pivotal year 4, I was honored with the role of Timekeeper, a responsibility that honed my organizational skills and instilled a sense of discipline. As I progressed, I was appointed Senior Prefect (Head Boy) in my final year, representing my school in various intra-school and inter-school debates and competitions.

Upon graduation, I earned a scholarship to Adeleke University Ede, Osun State, Nigeria, where I pursued a degree in computer science. During my undergraduate journey, I actively engaged in both academic and non-academic spheres. In the 200-level second semester, I joined a tutoring group dedicated to assisting junior-level students, primarily focusing on incoming freshmen. Additionally, I served as the treasurer for NACOSS (Nigeria Association of Computer Science Students), Adeleke University Chapter. Later, I assumed the role of Faculty President for the Faculty of Science Student Association (FOSSA).

In my capacity as the Faculty President, I established the FOSSA Research Group, fostering a collaborative environment for student-led research initiatives.

This multifaceted educational journey has equipped me with a diverse set of skills, ranging from academic excellence to leadership and organizational proficiency.

Thank you for considering this additional insight into my educational background.

Sincerely,

Tesleem Olamilekan MUTIULAH
